Workout D (P = None/S = None/A = None/C = Timed)

Notice there are no "sets" listed on this workout. Simply perform the prescribed reps for the time listed (next to the workout number). If you are wearing a heart rate monitor, your heart rate should be between 50-70% max heart rate for the whole session. If you don't have a heart rate monitor, you should be able to breathe through your nose the whole time. If you either a) get above 70% max heart rate, or b) can no longer only breathe through your nose, simply rest until your heart rate drops back into the appropriate zone and continue.
